**Remarks on the Exam**  
**”Macroeconomic Dynamics and Optimal Monetary Policy”**  
**on July 11th**

- During the exam, you are allowed to use the current manuscript ”Macroeconomic Dynamics and Optimal Monetary Policy” (including notes, but no extra paper sheets).
- The content of the numerical simulation tutorial is relevant for the exam.
- Among others, the exam may cover the following topics:
  - Decomposition methods
  - The importance of the eigenvalues for the system dynamics
  - Optimal monetary policy (targeting rules)
  - Blanchard-Kahn conditions

Good Luck!
